

Ex. No.:

Date: 26/9/24

Calculate Area and Perimeter

Write an Algorithm and draw a Flowchart to Calculate the area and perimeter of a square.

Algorithm:

Step-1 : Start
Step-2 : Read a
Step-3 : $\text{Area} = a \times a$
Step-4 : $\text{perimeter} = 4 \times a$
Step-5 : print Area and perimeter
Step-6 : Stop

Flowchart:

P
26/9/24

FLOWCHART:

Ex. No.:

Date: 26/9/24

Days to Year Conversion

Write an Algorithm and draw a Flowchart to convert the given days into years & months.

Algorithm:

Step 1: Start

Step 2: Input number of days

Step 3: compute $\text{years} = \text{total days} / 365$

Step 4: compute remaining days = $\text{total days} \% 365$

Step 5: compute months = $\text{remaining days} / 30$

Flowchart:

Step 6: compute days left = $\text{remaining days} \% 30$

Step 7: print years, months, days.

Step 8: Stop

26/9/24

FLOW CHART

Ex. No.:

Date: 26/9/24

Prime Number

Write an Algorithm and draw a Flowchart to check whether the given number is Prime or not.

Algorithm:

Step 1: Start

Step 2: read n

Step 3: Set f=1

Step 4: If 'n'==1 Then print "n" is not prime number go to step

Flowchart:

Step 5: For i=2 to n-1

Step 6: If $n \% i == 0$ Then set f=0 break

Step 7: else goto step 5

If f=0 Then

print ("n is not prime number")

else

print "n is prime number"

Step 8: Stop

26/9/24

Ex. No.:

Date: 28/9/24

Leap Year

Write an Algorithm and draw a Flowchart to check whether the given year is Leap year or not.

Algorithm:

Step 1: Start

Step 2: Read year, rem1, rem2, rem3

Step 3: $\text{rem1} = \text{year} \% 4$

Step 4: If $\text{rem1} == 0$

Step 5: $\text{rem2} = \text{year} \% 100$

Step 6: If $\text{rem2} == 0$ goto Step 7
else print "not Leap year"

Flowchart:

Step 7: $\text{rem3} = \text{year} \% 400$

Step 8: If $\text{rem3} == 0$
print "Leap year"

Step 9: Stop

05/10/20
